## **Abstract**

Local government is one of the public sector organizations that manages government budgets with various policies and programs to generate the most significant benefits for the people in their regions. This research design is a survey. It conducted this research at the Regional Finance Agency of the Central Mamuju Regency Government. This research is planned to last for approximately two months, starting from November 2019 to December 2019. Data collection was carried out through observation, interviews, questionnaires, documentation. The study sample was 50 people data analysis through research instrument test, validity test, reliability test. Governance has a positive and significant effect on the quality of work in the Central Mamuju Regency Government's Regional Finance Agency. Thus, it can conclude that administration will affect the quality of work. The use of information technology has a positive and significant effect on the quality of work at the Central Mamuju Regency Government's Regional Finance Agency.
