

resources that could be found easily, low cost, long term and easy to be maintained. The maintenance is required human discipline. These corals and shells should be stepped on by humans. There are a reciprocal relationships between human beings as residents and environment as a land of daily life. This activity makes human can do their activity easily without damaging the environment. This reciprocal relationship will be on synergy with quality last longer. The humans are lived with nature but they still have anything to get some protector to survive in nature they live in, such as to build their own building. The humans can not escape from the nature in fact. Life can be peaceful when nature is domesticated. The nature will not be tampered with, but arranged in form of human beings that can move safely and comfortably.
