## **Biographies**

**Simon Peter Nadeem** is a PhD candidate at the University of Derby. He earned his Executive MBA from Preston University and an MBA from the American University of Central Asia and is now pursuing PhD with a focus on Circular Economy and Logistics & Supply Chain Management. As a growing researcher, he has published in scientific journals, international conferences and a book chapter in the areas of Circular Economy, Lean, operations management and innovation.

**Jose Arturo Garza-Reyes** is a Professor of Operations Management and Head of the Centre for Supply Chain Improvement at the College of Business, Law and Social Sciences, University of Derby, UK. He is actively involved in industrial projects where he combines his knowledge, expertise and industrial experience in operations management to help organisations achieve excellence in their internal functions and supply chains. He has also led and managed international research projects funded by the British Academy, British Council and Mexico’s National Council of Science and Technology (CONACYT). As a leading academic, he has published over 100 articles in leading scientific journals, international conferences and four books in the areas of operations management and innovation, manufacturing performance measurement and quality management systems. Areas of expertise and interest for Professor Garza-Reyes include general aspects of operations and manufacturing management, business excellence, quality improvement, and performance measurement. He is a Chartered Engineer (CEng), a certified Six Sigma-Green Belt, and has over eight years of industrial experience working as Production Manager, Production Engineer and Operations Manager for several international and local companies in both the UK and Mexico. He is also a fellow member of the Higher Education Academy (FHEA) and a member of the Institution of Engineering Technology (MIET).

**Anthony Anosike** is Senior Lecturer at the Centre for Supply Chain Improvement, Derby Business School, University of Derby, UK. His current research interests include: modelling and simulation of manufacturing systems and supply networks; green supply chain, circular economy; ICT and Industry 4.0 applications in businesses. As well as publishing in a range of articles in leading international journals and conferences, he is also active in delivering business improvements in a wide range of business areas including manufacturing, supply chains and logistics.

**Vikas Kumar** is a Professor of Operations and Supply Chain Management at Bristol Business School, University of the West of England (UWE), UK. He holds a PhD degree in Management Studies from Exeter Business School, UK and a Bachelor of Technology (first class distinction) degree in Metallurgy and Material Science engineering from NIFFT, India. He has published more than 150 articles in leading International journals and International conferences including the International Journal of Production Research, Supply Chain Management: an International Journal, Expert System with Applications, Computers & Industrial Engineering, and Production Planning & Control. He serves on the editorial board of a number of international journals including Int. J. of Services, Economics and Management, Int. J. of Manufacturing Systems, and Int. J. of Lean Enterprise Research, and. His current research interests include Sustainability, Food Supply Chains, Blockchain, Operational Excellence, and Digital Supply Chains.
