## **Biographies**

**Juan Carlos Hernandez** is currently an undergraduate student in the Department of Industrial Engineering student in De La Salle University- Manila, Philippines.

**Carlos Jan Peñas** is currently an undergraduate student in the Department of Industrial Engineering student in De La Salle University- Manila, Philippines.

**Adrienne Tiu** is currently an undergraduate student in the Department of Industrial Engineering student in De La Salle University- Manila, Philippines.

**Charlle Sy** is an Associate Professor in the Department of Industrial Engineering at De La Salle University, Manila, Philippines. She earned her B.S. and M.S. in Industrial Engineering from the same university. Meanwhile, she obtained her PhD in Industrial and Systems Engineering in the National University of Singapore, Singapore. She has published in Scopus-indexed journals and conference papers and had completed research projects in the energy, service and semiconductor industries. Her research interests include optimization under uncertainty, energy networks, supply chains, and system dynamics.
