

significant tradeoff between the number of hardware, control and performance requirement and the allowed THD. The DVR has improved the quality of voltage at the sensitive load end. This paper will be helpful to other researchers who are keen on power quality improvement in the power distribution network

## 7.0 Biography

**K Chandrasekaran** is a Lecturer in the department of industrial engineering at University Tunku Abdul Rahman (UTAR) Kampar, Perak. He holds a Master of Science in Electrical and Electronics Engineering from University Technology Petronas (UTP) and has completed PhD in Engineering at University Tenaga Nasional (UNITEN). He has published in journal and conference papers. His research interests include Power Electronics, FACTS, Power Systems, and Filters. He is a Professional Engineer and Competent Engineer registered with IEM, BEM and EC, Malaysia.

**V.K. Ramachandaramurthy** is a Professor at University Tenaga Nasional. He is the Head of Power Quality Research Group, University Tenaga Nasional, Malaysia. He has published in journal and conference papers. He is a Professional Engineer registered with IEM, BEM, Malaysia.
