Biographies

Cunrong Li is a Professor, and Director of Master of Mechanical Engineering and Master of Industrial Engineering in the Department of Industrial Engineering at the Wuhan University of Technology, Wuhan, China. He earned B.S. in Mechanical & Electronics Engineering from Wuhan University of Technology, China, Masters in Mechanical Engineering from Wuhan University of Technology, China and PhD in Mechanical Engineering from Wuhan University of Technology, China. He was a visiting scholar at University of Liverpool and Louisiana State University. He has published journal and conference papers. Dr Li has completed research projects with Bhaba R. Sarker, Louisiana State University, KKB Hon, University of Liverpool, S. S. Guo, Wuhan University of Technology, M. Z. Yang, Wuhan University of Technology. His research interests include Production Planning & Control, Flexible/Cellular Manufacturing Systems, Material Handling, Scheduling, Location Theory, JIT Inventory Systems, Warehouse Logistics and Distribution, Lean Manufacturing, Supply Chain Management, Manufacturing Automation.

Geng Cui is a postgraduate student at the Wuhan University of Technology. In 2015, he received the B.Eng. in Industrial Engineering from Wuhan University of Technology, Hubei, China, and currently studying in the graduate school at Wuhan University of Technology with a Industrial Engineering major for a engineering master's degree.

Fei Xie is a postgraduate student at the Wuhan University of Technology. In 2015, he received the B.Eng. in Manufacturing and Automation from Wuhan Huaxia University of Technology, Hubei, China, and in 2017 the M.Eng. in Mechanical Engineering from Wuhan University of Technology.
