Biographies

Anwar Hamdan is a research assistant in the Sustainable Engineering Asset Management (SEAM) research group at University of Sharjah, UAE. He obtained his B.Sc. in Civil Engineering in 2016 from the University of Sharjah, and currently, he is pursuing a master's degree in Engineering Management.

Sadeque Hamdan is currently a PhD candidate in the Industrial Engineering Department at CentraleSupélec, Université Paris-Saclay, France. He worked as a research assistant at the Sustainable Engineering Asset Management (SEAM) research group at the University of Sharjah, Sharjah, United Arab Emirates during the period February 2016 till October 2019. He obtained both his M.Sc. in Engineering Management in 2015 and his B.Sc. in Civil Engineering in 2013 from the University of Sharjah, United Arab Emirates. His research areas are air traffic management, maritime transportation, supply chain management, applied optimization, and decision-making.

Ali Cheaitou is Associate Professor and Chairman of the Industrial Engineering and Engineering Management Department, College of Engineering, and member of SEAM Research Group, University of Sharjah. He served as the Program Coordinator of the PhD and M.Sc. in Engineering Management Programs between 2013 and 2017. Prior to joining University of Sharjah, Dr. Cheaitou worked as Assistant Professor at Euromed Management (Kedge Business School), Marseilles, France, as Lecturer at Ecole Centrale Paris, France, and also spent two years in the industry as ERP and supply chain management consultant, with L'Oréal, Paris, France. His main research areas are in applied optimization, logistics and supply chain management.

Imad Alsayouf is an associate professor of Industrial Engineering, employed by University of Sharjah, UAE. He is the founder and coordinator of the Sustainable Engineering Asset Management (SEAM) Research Group. He has produced more than 67 conference and journal papers. He has about 30 years of industrial and academic experience in various positions in Jordan, Sweden and UAE. His research interests include reliability, quality, maintenance, and optimization. He has developed and taught more than 25 post and undergrad courses. He delivered training courses in Kaizen, TQM, and organizational excellence.

Jonas Lundberg is senior associate professor in Information Design at Linköping University, Sweden. He is one of the leading researchers in the field of cognitive systems in Sweden, with a current research focus on interactive visualization for human-automation/human-automatious systems collaboration, and activity analysis frameworks for

high stakes domains. He has led and participated in projects across application domains, such as aviation and traffic management, maritime traffic management, emergency and crisis response.
