Biographies

Agus Ulinuha is an academic staff at the Department of Electrical Engineering, Universitas Muhammadiyah Surakarta (UMS). He earned B.S. in Electrical Engineering from Diponegoro University, Indonesia, Master in Electrical Engineering, Gadjah Mada University, Indonesia, and PhD in Electrical engineering, Curtin University of Technology, Australia. He is also currently appointed as the Head of Research Office at the University he is currently working for. His research interests are power system optimization, power quality, intelligent optimization technique, renewable energy, and electric transportation system.

Ibnu Shokhibul Khak is a B.S. Student at the Department of Electrical Engineering, Universitas Muhammadiyah Surakarta (UMS). He is currently working on final project about measurement and instrumentation system for electric vehicle. His research interest is about sensing and measurement, embedded system, and instrumentation.

Dimas Septian Dwi is a B.S. Student at the Department of Electrical Engineering, Universitas Muhammadiyah Surakarta (UMS). He is currently working on final project about controller system development for electric vehicle. His research interest is about power electronic, controller, and system optimization.
