Biographies

Chandra Mouli R. Madhuranthakam is an assistant professor in the department of chemical engineering at the Abu Dhabi University, Abu Dhabi, United Arab Emirates. He earned B.Tech in chemical engineering from Sri Venkateswara University, India Master's in chemical engineering at the Indian Institute of Science, Bangalore, India and PhD in chemical engineering University of Waterloo, Canada. He is a member of the American Institute of Chemical Engineers and the Institute for Operations Research and Management Sciences (INFORMS).

Azizeh Mohammad Nour Kamyabi was an undergraduate student graduated from Abu Dhabi University

Gharisa Mohamed Almheiri was an undergraduate student graduated from Abu Dhabi University

Ali Elkamel is a Professor of Chemical Engineering. He holds a BSc in Chemical Engineering and BSc in Mathematics from Colorado School of Mines, MSc in Chemical Engineering from the University of Colorado-Boulder, and PhD in Chemical Engineering from Purdue University – West Lafayette, Indiana. His specific research interests are in computer-aided modelling, optimization and simulation with applications to energy production planning, carbon management, sustainable operations and product design. Prof. Elkamel supervised over 90 graduate students (of which 35 are PhDs) and more than 30 post-doctoral fellows/research associates. Among his accomplishments are the Research Excellence Award, the Excellence in Graduate Supervision Award, the Outstanding Faculty Award, the Best teacher award, and the IEOM (Industrial engineering and Operations Management) Outstanding Service and Distinguished Educator Award. He has more than 280 journal articles, 141 proceedings, and 33 book chapters. He is also a co-author of four books; two recent books were published by Wiley and entitled Planning of Refinery and Petrochemical Operations and Environmentally Conscious Fossil Energy Production.
