### **Abstract**

Paddy and paddy related activities like paddy production, paddy processing, and its marketing comprises the major economic activities of most of the workers in our country. Like the farmers of our country, the workers of rice mills also face a lot of hazards. They work in unhealthy working environment and even they don't have sufficient safety measures to save the life of workers. The paper brings to light the influential hazards faced by most of the selected workers in the rice mills of Shiekhghat, Sylhet city. The paper focuses on the causes of vulnerability of the rice mills workers to various occupational health hazards, discussion on effects of occupational health hazards upon the occupational and social life of the rice mills workers and suggestion for improving the occupational health of the selected rice mills workers.

### **Keywords**

Paddy Production, Hazard, Safety, and Health.
