

Table of Contents

ID	Title
101	Interpretive Structural Modelling for Understanding the Inhibitors of a Telecom Service Supply Chain
102	Optimal Fuzzy Inventory Policies via Fuzzy Geometric Programming
103	Determinants of Supply Management Performance: A Study of the. Garment Industry in Bangladesh
104	Design of a Direct Gain Passive Solar Heating System
105	Quality Costing: An Efficient Tool for Quality Improvement Measurement
106	Contemporary Model for Project Selection in Changing World
107	Performance Comparison of Domestic Refrigerator using HFC134a and HFC134a/HC Refrigerant Mixture
108	A Decision-Making Optimization Model for Implementing Biomass Gasification Plant in Tamil Nadu
109	Biomedical Signal Processing and Applications
110	Using Linear Programming with Education Cost for Enhancing the Level of Human Resource Efficiency
111	A Case Study on Implementation of New MINOMI Type Material Handling System Concept as an Element of Global Manufacturing in a Reputed Automotive Manufacturing Plant
112	Development and Optimization Methodology for Implementation of New Body Shop Area in Car Manufacturing Plant -A Case Study
113	Understanding Project Complexity from the Perspective of a Project Manager
114	A Case Study of Evaluation the Effectiveness of Implementing Quality Management System (ISO 9001:2000) in Gas Processing Plants of National Iranian Gas Company (NIGC) using Balanced Scorecard (BSC) Methodology
115	Queuing based Analysis of Inventory Control in a Multi-Level Supply Chain
116	Development of an Integrated Method for Analyzing Ergonomic Compliance of a Workstation
117	Industrialization and Its Impact on Agriculture: A Case Study on Savar Upozilla, Dhaka, Bangladesh
118	Assessing the Impact of Multi-Loop Kanban Systems in a High-Volume Fabrication System
120	Prospects of Remanufacturing - Bangladesh Perspective
121	A Meta-Heuristic Algorithm for Solving Economic Lot Scheduling Problem (ELSP)
122	Selection of Industrial Robots using Compromise Ranking Method
123	Facility Location Selection using PROMETHEE II Method

124	A TOPSIS Method-based Approach to Machine Tool Selection
125	A Group Decision Making Method for Determining the Importance of Customer Needs Based on Customer- Oriented Approach
126	Design of Two Switch Mechanism Concepts for a Surgical Shears Device
127	Application of ISO – 9001: 2008 in Academic Institutions
128	Ranking Alternatives in Multiple Criteria Decision Analysis Based on a Common-Weight DEA
129	Recognition of Control Chart Patterns using Discriminant Analysis of Shape Features
130	Selection of Weapon using Digraph and Matrix Methods
132	Managing Material Flow at the US Shipbuilding Industry
133	Productivity Improvement through Line Balancing in Apparel Industries
134	Scheduler - Flexible Scheduling Method, Interface with Planning and Production
136	An Industrial Application of DMECA Approach to Management Process Analysis
137	Surface Texture Investigation in High-Speed Flat End Milling of Ti-6Al-4V
138	Investigation of Effect of Chatter Amplitude on Surface Roughness during End Milling of Medium Carbon Steel
139	Behavioral Analysis of Hydraulically Driven Fire Fighting Water Monitor Trailer
140	Investigating the Relation between Ergonomic Risk Factors and Muskuloskeletal Disorder (MSDS) of Computer Operators
141	Ensuring Safety: A Great Challenge for Electricity Distribution System
142	Decision Analysis for Avoiding Disastrous Consequence of Iran's Nuclear Conflict
144	Modularity: Catalyst of Innovation
145	Measuring Organizational Leanness Using Fuzzy Approach
146	The Effect of Display Type and Video Game Type on Visual Fatigue and Mental Workload
148	Management of Supply Chain in Petroleum Corporations in India
150	A Model for Automatic Preventive Maintenance Scheduling and Application Database Software
151	Educating Future Engineers: An Example
153	A Market Driven Demand Estimation Model for the Indian Petroleum Industry
154	Application of Systematic Layout Planning in Hypermarkets

155	Reengineering of Logistics Value Chain of a Petroleum Products Marketing Company – Formulation of a Performance Measurement System
156	Performance Appraisal of Public Sector Service Organization
157	Modification of Spur Gear Using Computational Method-Involutes Profile Being Modify
158	Modelling Choice of Mobile Technology for M-Banking
160	Collaboration as a Strategy for Auto-service Business at Supermarkets
161	Impacts of Common Components in Multistage Production System under Uncertain Conditions
163	Possibility Programming Application in Analysis of Fuzzy Knapsack Problems
164	Enhancement of Tool Material Machining Characteristics with Cryogenic Treatment: A Review
165	Effect of Total Quality Management on Performance of Indian Pharmaceutical Industries
166	Automotive Sector - A Country Wise Comparative Analysis: India-Spain-Brazil
167	BRTS- Bus Rapid Transit System in Pune: Modeling, Simulation and Feasibility Analysis
168	A New Balancing Approach in Balanced Scorecard by Applying Cooperative Game Theory
169	Translating the Student's Voice into Teaching Techniques: A Quality Function Deployment Approach
170	Models for Bed Occupancy Management of a Hospital in Singapore
172	Envisages of New Product Developments in Small and Medium Enterprises through Virtual Team
173	An Empirical Investigation of Inventory Management Practices of Processed Food Supply Chain in Sri Lanka-Manufacturer's Perspective: A Case Study
174	Searching for an Efficient Fouling Index for Reverse Osmosis Desalination: A Statistical Approach
175	Design and Kaizen of Automated Assembly Production Lines Using 3D Computer Graphics
176	Pharmaceutical Care of People in the Community for the Recognition Rate and the Pharmaceutical Service Satisfaction Study
177	A Robust Optimization Approach for the Milk Run Problem with Time Windows under Inventory Uncertainty - An Auto Industry Supply Chain Case Study

178	QMS Positive Impact for SMEs: An Indian Textile Exporter's Example
179	Designing a Quality Control System for Mean Vector and Change Point Diagnosis in Multivariate Normal Process
180	Structural Modeling of a Manufacturing Organization Focusing on Worker Allocation
181	Assessment of the Risks for Workers Using FMEA: A Case Study in a Pharmaceutical Industry
182	CBM (Condition Based Maintenance) through Score Normalization of Voice Biometrics
183	Emerging Trends in e-Manufacturing, Web-enabled Integration and Smart Manufacturing
184	Measurement of Service Quality of an Automobile Service Centre
185	An Empirical Study of Educational Supply Chain Management for the Universities
187	An Inventory Model with Linear Demand Rate, Finite Rate of Production with Shortages and Complete Backlogging
188	Effectiveness of Advanced Manufacturing Technologies in SMEs of Auto Parts Manufacturing
190	A Framework for Assessing Management Losses from TPM Perspective
191	Measurement of TPM Losses Due to Skill Level Difference of Workers: Case Study of a Pharmaceutical Company
192	Integrated Scheduling of Equipments in a Container Terminal Using Simulation and Analytical Methods
193	Simulated Annealing and Tabu Search based Hybrid Algorithm for Multi Depot Vehicle Routing Problem with Time Windows and Split Delivery
194	Simultaneous Task Allocation and Motion Coordination Algorithm for Multiple Autonomous Vehicles in Dynamic Environment
195	Artificial Intelligence Computational Techniques to Optimize a Multi Objective Oriented Distribution Operations
196	Simulation of an Interdependent Metro-Bus Transit System to Analyze Bus Schedules from Passenger Perspective
197	Analysis of Brainwave Signals to Describe User Preference from Similar Products
198	An Optimal Rotational Cyclic Policy for a Supply Chain System with Imperfect Matching Inventory and JIT Delivery
199	Applying Quality Cost Analysis in Manufacturing of Power Generators
200	Meta Analytic Approach to Compare Competence Indices of an Automobile Company

201	A Compact FPGA Implementation of Triple-DES Encryption, System with IP Core Generation and On-Chip Verification
202	Innovative Approach to Engineering Education
203	Green Supply Chain Management; Critical Research and Practices
204	Optimization Technique-Supply Chain in Reverse Logistics
205	An Inventory Model with Linear Demand Rate, Finite Rate of Production with Shortages and Complete Backlogging
206	Solving Capacitated P-Median Problem by Hybrid K-Means Clustering and Fixed Neighborhood Search Algorithm
207	A Decision Support Model for Bank Branch Location Selection
208	Design of a Facial Prosthesis
209	Minimizing Makespan in Flowshops with Bounded Processing Times
211	Reliability Modeling of a Manufacturing Cell Operated under Degraded Mode
212	Modeling and Analysis of Fire Center Locations in a City to Minimize Response Time
213	TQM for Bangladesh Power Generating Sector
214	The Rationale of Lean and TPM
215	Connectivity Management in Mobile Ad Hoc Networks: A Fuzzy Based Semi-Distributed Approach
217	Layered OSGi-based Reconfigurable Lightweight RFID Reader Protocol
218	A Fuzzy Cost-based FMEA Model
219	Complexity Level in Industrial Firms: Case Studies Implementation
220	Point Process Based Maintenance Modeling for Repairable Systems: A Review
221	Minimizing Total Completion Time in Flowshops with Bounded Processing Times
222	Evaluation of the Current Maintenance System and Maintenance Management System in KIMIA Co
223	Modelling Cost of Maintenance Contract for Rail Infrastructure
224	Energy Consumption, Energy Savings and Emission Analysis for Industrial Motors
225	Development of a Web based Education Module for Verilog HDL
226	Simulation Based Decision Support System (SBDSS) for the Vehicles Repair and Maintenance in Dynamic Business Environment
227	Employee Attrition in Engineering Firms: Case Study of DCIPS Pvt. Ltd, India
228	Grounded Linguistic Symbols and WordNet Ontologies

229	A Pair of Large-Incidence-Angle Cylinders in Crossflow with the Upstream One Subjected to a Transverse Harmonic Oscillation
230	Intermittent Demand Forecast and Inventory Reduction Using Bayesian ARIMA Approach
231	A New Organizational Structure for the Managing Production Process by Focusing on the Maintenance and Process
232	Advanced Design for Robot in Mars Exploration
233	An Integrated Supply Chain Model for the Supply Uncertainty Problem
234	Secure Mobile Payment System in e-Commerce
235	Model for Forecasting Passenger of Airport
236	A 1-V LNA for UWB Applications in 90 nm CMOS Technology
237	Development of a Mobile Agent for Modern e-shopping
238	Corner Effects in SOI Vs Bulk Tri gate FinFETs using 3D device simulation
239	Global Outsourcing Strategy: Product Development Perspective
240	Cost and Return Analysis of Tea Industry - A Case Study on Dauracherra and New Samanbagh Tea Estate
241	Optimal Production Run Length for Products Sold with Warranty in a Deteriorating Production System with a Time Varying Defective Rate under Allowable Shortages
242	A Tabu Search Algorithm for Determining the Economic Design Parameters of an Integrated Production Planning, Quality Control and Preventive Maintenance Policy
243	Analyzing and Evaluation of Quality Management System in Bandar Imam Petrochemical Company (BIPC)
244	Tradeoffs among Paradigms in Supply Chain Management
245	Stochastic Investment Decision Making with Dynamic Programming
246	Application of the Lean Six Sigma Problem Solving Methodology in Law Enforcement: A Case Study at the Philippine Drug Enforcement Agency
247	Demand Based Pricing Model for Outsourced Software Application Maintenance
248	Leveraging Web 2.0 for Increasing Competitiveness of Offshore-Driven IT Industry
249	Crashing Project Time by Linear Programming (LP): A Case Study
250	Design of On-Board Weighing System for Effective Supply Chain Management
251	Open Loop Supply Chain Model for the Automotive Industry Using Hybrid K-Means GA with SA
252	Re-balancing of Generalized Assembly Lines – Searching Optimal Solutions for SALBP (Simple Assembly Line Balancing Problem)

253	Simulation Modelling of ‘PHN (public health nurse) – Dyad (a pair of newborn baby and mother)’ Postpartum Home Visiting System
254	Ranking of Bangladeshi Coals Based on Fuzzy Set Theory
255	A MIMIC Model Approach for Viewers’ Response Analysis of Mass Entertainment Television Channels
256	The Relationship between Project Management and E-Collaboration
257	Minimizing Makespan for a Flexible Flow Shop Scheduling Problem in a Paint Company
258	Production Planning using Simulation Approach verses Hybrid Approach: A Case Study
259	Reliability Assessment of Used Components in Consumer Electronics Products
260	Applications of Data Mining Techniques in Customer Churn Prediction
261	Design and Manufacturing of a Stair Climbing Vehicle
263	On Developing an Adaptive Gage R&R Evaluation Model of Measurement System
264	A Stochastic Multi-Product, Multi-Stage Supply Chain Design Considering Products Waiting Time in the Queue
277	Application of Integer Linear Programming Model for Vendor Selection in a Two Stage Supply Chain
278	Procurement Management Challenges in Gas Projects of Iran
279	Application of Integer Linear Programming Model in Vendor Selection
280	Preventive Maintenance Optimization of Critical Equipments in Process Plant using Heuristic Algorithms
281	Application of a Plug-and-Play Guidance Module for Hospital Robots
282	FFT Based Spectrum Analysis of Three Phase Signals in Park (d-q) Plane
283	Development of Interactive CAD Teaching System
285	Shippers-Providers Perception of Third-Party Logistics Services – An Importance-Performance Matrix Analysis
287	Operating Point Optimization of a Poly-Phase Asynchronous Machine for Energy Saving
288	Signal Assessment of a Current Transformer Used in Load Demand of Variable Active and Reactive Power Ratio
289	OR Modeling and Public Policies in Bangladesh: Implementation Challenges
291	Kanban Supplier System as a Standardization Method and WIP Reduction

292	Fuzzy Clustering for Initialization of Simulated Annealing Algorithm to Solve a Capacitated Vehicle Routing Problem
294	A Granular Computing Approach to Decision Analysis using Rough Set Theory
295	Analysis of Potential Wind and Solar Energy at Selected Airport Locations in Canada
296	The Application of Occupational Safety and Health Management in Train Workshop” Balai Yasa”
299	Productivity Assessment and Its Improvement Strategies for a Ceramic Industry – A Case Study
300	Method and Algorithm for solving the Bicriterion Network Problem
301	Developing an Information Model for Supply Chain Information Flow and its Management
302	Recognition of Control Chart Patterns using Discriminant Analysis of Shape Features
303	Superplastic Behavior of Al5083 Alloy during Microforming Process
304	Six Sigma based Control Chart for the Number of Defectives
305	Construction and Selection of Tightened-Normal-Tightened Schemes of Type TNT-($n_1, n_2; c$) indexed through Six Sigma Quality Levels
306	Dynamic Analysis of Petrochemical Project Progress - A System Dynamics Approach
307	Optimal Solution for Multi-Objective Facility Layout Problem Using Genetic Algorithm
308	Performance Analysis of Coal fired Power Plants in India
309	A Quality Function Deployment Approach for Improving Quality of Yarn: A Case Study
310	Reliability Modeling of a Manufacturing Cell Operated under Degraded Mode
311	Decision Analysis in Sector Selection: A Case Study of a Development Organization
312	Heuristic Solution of Multi Item Dynamic Lot-Sizing: A Case Study
314	Optimal Replenishment Policy under Supplier-Retailer’s Partial Credit Financing in a Supply Chain
315	Literature Review and Future Directions in SCM Research
316	New Insights into Industrial Leadership Assessment and Development: Assessment, Antecedents and Development
